

# Conceptis Colour Fill-a-Pix

## Rules

Each puzzle consists of a grid containing clues in various places. Each clue indicates how many squares in a 3x3 box surrounding it should be painted in the colour of the clue. The object is to reveal a hidden picture by painting all squares in the grid according to the clues. Note that the colour of a square containing a clue can differ from the colour of the clue.

## Example

	1	1		5	6			6	
	8	8		2
